SUMMARY

Quality Engineering Analyst with over 3 years of experience at Accenture delivering QA for Google's payments platform, combined with hands-on automation expertise across Selenium, Playwright, and BDD frameworks. Skilled in manual and automated testing, API and database validation, accessibility compliance, and defect root-cause analysis. Experienced in Agile delivery, test planning, status reporting, and UAT support, with a proven record of reducing manual testing effort by 25% and improving release quality. Recognised with the Accenture Extra Mile Award for agility and effective task prioritisation.

PROFESSIONAL EXPERIENCE

Quality Engineering Analyst

Jan 2021 – Sep 2024

Accenture

Client: Google

- Designed and executed **250+** manual and automated test cases, applying **functional, regression, data-validation, and risk-based testing** to payment-platform changes and API migrations; reduced **testing time by 15%** and **manual effort by 25%** through optimised test strategies.
- Automated **testing and validation workflows** using **Python and Java**; executed daily regression suites, performed **API testing with Postman**, validated backend data integrity, and conducted **performance and load testing** to assess scalability during large-scale platform migrations.
- Led **mobile application testing** across **iOS and Android** for e-commerce functionality, ensuring cross-device compatibility; validated marketing communications against **Figma** designs, performed **A/B testing**, and verified end-to-end user experience.
- Led **accessibility compliance testing** using **JAWS and NVDA**, identifying and raising **50+** **accessibility defects** that improved application usability and earned **client recognition**; ensured solutions met accessibility standards and were **UAT-ready**.
- Investigated **production incidents** through **log analysis, debugging, and root-cause analysis**; collaborated with developers and stakeholders to resolve critical defects, reviewed release builds, provided **production sign-offs**, and delivered post-implementation support to maintain system stability.
- Supported **end-to-end Agile and Waterfall delivery** by coordinating QA activities, managing **test planning, defect lifecycle, traceability, milestone tracking, and status reporting**; applied risk-based prioritisation and mentored junior team members, contributing to reduced post-release defects.

SKILLS

Testing: Manual Testing, Functional Testing, Regression Testing, Exploratory Testing, Positive & Negative Testing, Boundary-Value Analysis, Cross-Browser Testing, Accessibility Testing (JAWS, NVDA), API Testing, Database Testing, Mobile Testing (iOS & Android), Performance & Load Testing, A/B Testing

Test Automation: Selenium WebDriver, Playwright, TestNG, Cucumber, Gherkin, JUnit Platform, Page Object Model
Programming & Databases: Java, Python, TypeScript, SQL, PostgreSQL, REST API Validation, Data Integrity Testing

Build & CI/CD: Maven, GitHub Actions, Git, GitHub, VS Code

Defect & Production Analysis: Test-Case Design, Defect Reporting, Log Analysis, Debugging, Root-Cause Analysis

Project Delivery: Agile / Scrum, Sprint Coordination, Test Planning, Defect Lifecycle Management, Risk & Issue Identification, Scope, Schedule & Quality Management, Status Reporting & Documentation, UAT & Go-Live Support

Professional: Stakeholder Communication, Technical Documentation, Mentoring, Cross-Functional Collaboration

EDUCATION

University of Liverpool

Sept 2024 – Sept 2025

Master of Science in Data Science and AI

Grade: Merit

NMAM Institute of Technology

Jun 2016 – Jun 2020

Bachelor of Engineering in Electronics and Communication Engineering

Grade: Distinction

PROJECTS

Playwright Web Quality Framework | *Playwright, TypeScript, REST APIs, axe-core, GitHub Actions* | 2026

- Developed an **end-to-end test automation framework** using **Playwright and TypeScript**, covering **TodoMVC user journeys, REST API validation, and accessibility testing**.
- Completed **16 successful test executions** across **Chromium, Firefox, and WebKit**, validating application behaviour and cross-browser compatibility.
- Implemented **reusable Page Object Models, assertions, automated accessibility scans, HTML reporting, and CI execution**, improving framework maintainability and supporting reliable automated test delivery.

Selenium Login Automation Framework | *Java, Selenium WebDriver, TestNG, Maven, Page Object Model* | 2026

- Automated **four positive and negative login scenarios** for SauceDemo using **Java and Selenium WebDriver**, validating authentication behaviour across multiple test conditions.
- Implemented the **Page Object Model (POM), explicit waits, TestNG assertions, headless execution**, and automatic failure screenshots to build a maintainable and reliable test automation framework.
- Configured **GitHub Actions CI** to automatically execute the test suite on code changes, enabling **continuous testing** and early detection of failures.

BDD E-commerce Checkout Automation | *Java, Selenium, Cucumber, Gherkin, JUnit Platform, Maven* | 2026

- Designed and implemented **4 BDD test scenarios** covering end-to-end **SauceDemo login, shopping-cart, and checkout workflows** using **Cucumber and Gherkin**.
- Translated **business-readable Gherkin scenarios** into reusable **Selenium step definitions and Page Object Model (POM)** components using **Java**, improving test maintainability and code reuse.
- Integrated **headless browser execution, failure screenshots, HTML test reports, and GitHub Actions CI**, enabling automated test execution and improved visibility into test failures.

SQL Payment Database Testing | *PostgreSQL, SQL, Bash* | 2026

- Designed and executed **10 database test cases** to validate **payment records, customer relationships, business rules, and data integrity** across relational datasets.
- Tested critical data-quality scenarios including **duplicate records, invalid transaction amounts, unsupported payment statuses, and broken relational links**, identifying potential integrity violations.
- Applied **positive and negative testing techniques** to verify **database constraints, validation rules, and expected system behaviour** under both valid and invalid data conditions.

Manual E-commerce Testing Portfolio | *Manual Testing, Test Design, Defect Reporting, Accessibility Testing* | 2026

- Designed and executed **15 test cases** covering end-to-end **DemoBlaze customer journeys**, including registration, login, product filtering, cart management, and checkout.
- Applied **positive, negative, boundary-value, and keyboard-accessibility testing** to validate application functionality, usability, and edge-case behaviour.
- Identified and documented **4 defects** with detailed reproduction steps, severity, expected vs. actual results, and **screenshot evidence** to support effective defect resolution.
- Produced comprehensive **QA documentation**, including requirements, acceptance criteria, a test plan, and a final **test-results report** to demonstrate structured end-to-end testing.

ACHIEVEMENTS & CERTIFICATIONS

Accenture Extra Mile Award (Individual category) – 2022

Recognised for staying agile and resilient, successfully prioritising critical tasks to drive efficiency and embodying the One Accenture culture.

The Complete SQL Bootcamp – Udemy (2026)

Covered SQL querying, joins, data analysis, and database fundamentals.

Accenture Tech Expressway Program (2020)

Completed 6-month intensive training in Java, RDBMS, Python, and test automation tools (Selenium, UFT, Cucumber, ALM), alongside Agile and DevOps practices.

Diploma in Python – Manipal Institute of Computer Education (2019)

Completed comprehensive training in core Python programming.
